Subject: Hiandri packer use in GIB® Performance systems

To James Pere,

Winstone Wallboards is aware of the BRANZ TO11824 Opinion and Summary Report as well as the process you have gone through to verify the performance of the Hiandri packer system when installed under timber framed GIB® fire-rated wall systems.

Obviously it is not the responsibility of Winstone Wallboards to outright verify your tests data and claims, however we have no issues with this BRANZ documentation supporting your Hiandri packer system when used as detailed and in combination with the referenced GIB® Systems.

I trust this information is of assistance.

WWB offers a GIB® 10 Year product warranty which covers the products used within the GIB® Fire rated systems, the use of a Hiandri packer won't change the warranty for the components supplied by GIB®.

Regards,
